SUMMARY

Backend developer with 6+ years of software development experience in PHP, Laravel and C#/.NET. Builds REST APIs, role-based business applications and third-party integrations for enterprise clients, and develops personal projects with local LLMs and AI coding agents.

PROJECTS

G-Maestro — AI agent orchestration system (personal, 2026) · Python, Ollama, Claude Code

- Manages local LLMs and Claude Code from a Telegram bot and web panel; each agent change is prepared in an isolated git worktree and arrives as a pull request that is approved manually.

Genvify (EnviroTrack) (in development) — regulation tracking app for environmental engineers (Expo / React Native).

Norluna (2026) — mobile astrology app with a TR/EN content pipeline on a local LLM (Gemma 3, Node.js, Supabase).

Medicabytes (2026) — offline-first medication and allergy-aware health assistant (Expo React Native, TypeScript, SQLite).

TrioZone Space AI Companion (2025) — earthquake safety assistant using YOLOv8 and multimodal models.
